Full Manual at:
www.technovision.com/manuals.html#hd01

Operation

The HD01 high definition digital signage player is capable of playing back full-motion audio & video clips from standard SD/SDHC cards (**FAT32 or NTFS formatted**) or USB 2.0 media.

Video file formats (extensions) supported:
AVC, AVI, DIVX, MKV, MOV, HDMOV, MP4, FLV, VOB, MPG, DAT, MPEG, TS, TP, M2TS, and WMV.
CODECS supported:
H.264, H.263, WMN9/VC-1, and MPEG1/2/4
Audio formats supported:
MP3, DTS, WMA, OGG, and AAC.
Image formats supported:
BMP, JPG, PNG and GIF.

** NOTE **
DO NOT PLUG A STEREO CONNECTOR INTO THE A/V PORT ON THE HD-01. THIS CONNECTOR HAS AUDIO AND VIDEO SIGNALS

Initial Setup

Once plugged in, with the AUTO PLAY set to "Movie", the player will automatically power on, and within 10 seconds, will begin to play from the point from where it last left off. If the HD01 does not automatically start playing, you may need to set the AUTO PLAY on the SETTING menu to "Movie".

While playing, you can press the MENU to go to the SETTING Menu or HOME button to go to the MAIN MENU or

MAIN MENU

The main menu has five icons:
Files   lists all the files on the storage media
Music   lists the audio files
Movie   lists the video files
Photo   lists the image files

Auto Detect hdmi	Off / **On** Will automatically switch if cable and monitor is attached.
Restore Default	[YES] / [NO]
System Info	TVD 2.0 2014-11-15

FAQs

Q: I would like to run my video on the hdmi, but have the audio come out of the A/V connector.
A: On the SETUP MENU change Audio Output to "Analog".

Q: Can I plug a standard 3.5mm stereo audio cable into the AV OUT instead of the (3-RCA) AV cable that came with the player?
A: The AV OUT is NOT a stereo audio connector – you will short the video, potentially damaging the player.
